We are delighted to announce that our Head of Department, Professor W.K. Chow, JP, has recently been inducted as a Fellow of the American Society of Mechanical Engineers (ASME).

The ASME Fellow is a membership grade of distinction. A member will only be named as an ASME Fellow if he or she has fulfilled the organisation’s vision and become "the essential resource for mechanical engineers and other technical professionals throughout the world for solutions that benefit mankind".

Nominated by ASME Members and Fellows, a candidate has to have 10 or more years of active participation and at least 10 years of active corporate membership. Fellows of the ASME are prominent professional and society leaders who have made significant contributions to the engineering profession.

This award recognises Prof. Chow’s pioneering contributions to the field of fire engineering and his outstanding academic achievements.
