

## **BSE Public CPD Lecture – Integrated, Energy Efficient Design and Operation of Building Systems on 5 October 2010**

A BSE public CPD lecture on *Integrated, Energy Efficient Design and Operation of Building Systems* was held on 5 October 2010 (Tuesday).

The activity was chaired by Prof. Walter Yuen, Chair Professor of Thermal Science and Engineering of the Department, who is also Vice President – Academic Development of PolyU.

Advanced technologies with applications of non-linear dynamics were presented by Prof. Igor Mezic of Department of Mechanical Engineering, University of California at Santa Barbara. The information is believed to be very useful to improve building energy efficiency.

CPD lecture by Professor Mezic

Finally, design aspects of building services systems and potential applications in Hong Kong were briefly outlined by Prof. Daniel Chan. 30 participants attended this CPD lecture.
